

### REMARKS

The present Amendment revises the specification to correct a minor clerical error. Specifically, page 23, line 10 is amended to recite "3,000 mPa·s" instead of "300 mPa·s". This amendment is consistent with the range of 500 to 5,000 mPa·s and 800 to 4,000 mPa·s as recited in lines 9-10 on page 23 of the specification. Accordingly, this amendment does not add new matter to the specification.

Prompt and favorable examination is requested.

Respectfully submitted,

Garrett V. Davis  
Reg. No. 32,023
